# WHO WE ARE ?

With ingenuity and original intention, we do a good job with each product, so that every customer can experience the fun of riding.

## ABOUT US

### Tianjin Panda Technology Group Co. LTD

Tianjin Panda Technology Group Co., Ltd. is a group technology company integrating R&D, production, sales and service. The group is committed to providing intelligent cycling solutions for people around the world.

The company's early layout mainly focuses on R&D and production. It has production bases in Tianjin and Hebei. Its products cover adult bicycles, mountain bikes, baby bicycles, electric bicycles, and their parts. After years of research and deep cultivation in the industry and product fields, the group has Supply chain systems, production and processing technology, quality inspection and control process, product research and development technology, talent training system and other aspects that have reached the domestic advanced level.

According to the group's development strategy, the company will comprehensively transform to intelligence and globalization, empower Chinese manufacturing through technological research and development, and allow more people in the world to experience the excellent experience of intelligent cycling.

### GLOBALIZATION

### INTELLIGENT

**SUPANDA**

## OUR STRENGTH

The group has 3 mountain bike assembly plants, 1 electric bike assembly plant, 1 front fork processing and production plant, 1 frame processing and production plant, 1 paint factory, and a number of strategic cooperation-based factories.

It covers an area of about 330,000 square meters and employs more than 500 people. Its annual comprehensive production capacity exceeds 1 million units and annual sales exceed 350 million yuan.

# ENTERPRISE CULTURE

## Corporate vision:

Provide intelligent cycling solutions for people around the world.

## Mission:

Let more people in the world feel the excellent experience of intelligent cycling.

## Core value:

**Truth-seeking:** tell the truth, do practical things, and seek practical results;

**Forge ahead:** cherish the original intention, cherish the aspirations, cherish the awe;

**Mutual assistance:** work together, share and grow together;

**Innovation:** breaking the stereotype, bravely surpassing, and dare to be the first.

# BUSINESS PHILOSOPHY

## Quality-oriented:

- selection of high-quality supply systems
- supervision of high-quality production processes
- control of high-quality testing details

## Customer-oriented:

- Understanding customer needs
- Meeting customer needs
- Helping customers achieve their goals

# DEVELOPMENT PROCESS AND FUTURE

## IN 1999

It began to enter the bicycle industry, built a strong supply chain system, production system, and R&D system, and gradually expanded its market share;

## IN 2006

In 2006, based on bicycle products, we focused on expanding and strengthening the mid-to-high-end market, and successively launched high-end products such as carbon fiber and chrome-molybdenum steel to further expand product categories and continuously improve product competitiveness;

## IN 2013

It actively created brand innovation, sublimated and extended the bicycle concept in terms of business scale and product research and development, joined the electric bicycle production and sales industry, and became a large-scale professional, large-scale and serialized bicycle production enterprise;

# PLANNING

## IN 2019

---

We will integrate industry resources, set up a group company, start to deploy the international market, and comprehensively transform to intelligence and globalization;

## IN 2025

---

In response to the direction of national policies, it will land in the government's key demonstration industrial parks, and strive to build a "five-in-one" bicycle industry leader in benchmarking, intelligence, internationalization, branding, and service;

## IN 2030

---

Actively explore and study the international investment environment, establish foreign branches and processing plants, and strive to enter the world's first-line brands to realize the true meaning of Chinese-made brands going overseas.

# MOUNTAIN BIKE

Mountain bike is strong, rugged, with novel appearance, dazzling colors and superior riding performance.

It can ride on the trails, climb over hills and participate in competitions. It is now the fashion pursued by urban youths.

Own a mountain bike and enjoy riding with your friends!
